CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

TERMS OF REFERENCE

Tender No: LDPWRI- ROADS/ 20054: APPOINTMENT OF PROFESSIONAL ROAD SAFETY CONSULTANTS TO CONDUCT ROAD SAFETY AUDIT IN THE VHEMBE DISTRICT FOR A PERIOD OF 36 MONTHS

APPOINTMENT OF PROFESSIONAL ROAD SAFETY AUDITORS TO CONDUCT ROAD SAFETY AUDITING IN THE VHEMBE DISTRICT FOR A PERIOD OF 36 MONTHS

1. INTRODUCTION AND BACKGROUND

As part of the Provincial Road maintenance Grant framework (PRMG) as contained in the 2018 Division of revenue Act (DoRA), the Department Of Public Works, Roads And Infrastructure Of The Limpopo Province requires Road Safety Appraisals to be carried out on the road network, in particular the strategic network.

Road Safety Appraisal has been defined as *“A systematic examination of an existing road location, in which an independent and qualified team reviews on-site conditions and historical evidence to identify existing or potential road safety problems and suggest measures to mitigate those problems”*

The definition of the road safety appraisal is very similar to that for the road safety audit, with the added review of historical evidence. This allows the introduction of road crash information and any other information that are relevant to the reactive approach to road safety improvement, to be combined with the pro-active approach of a road safety audit.

2. OBJECTIVES

The objectives of the Road Safety Audits on existing roads are as follows:

- To ensure compatibility between the safety features of a road and the functional classification of the road;
- To identify any feature that can, with time, create a safety problem – for example vegetation blocking a sign;
- To identify all features in the road environment that poses a safety hazard to any of the road users.

3. SCOPE OF WORK

Suitably qualified and professionally registered road safety auditors are required to undertake road safety appraisals for the Department for a period of 36 Months. The intention of the appraisals will be to identify hazardous locations on the network and assist the Department in implementing road safety countermeasures as part of the road maintenance programmes.

The appraisals shall be carried out by independent road safety auditors who's firms are not actively involved with the design of a particular road being appraised.

It is a requirement that the road safety appraisals be carried out as set out in the South African Road Safety Audit Manual 2012, as extracted below:

3.1 Process

- The audit brief and the provision of background information shall be similar to the road safety audit process with certain additional requirements:

APPOINTMENT OF PROFESSIONAL ROAD SAFETY AUDITORS TO CONDUCT ROAD SAFETY AUDITING IN THE VHEMBE DISTRICT FOR A PERIOD OF 36 MONTHS

- Analysing existing crash data to identify possible clusters of crashes and over-exposure of specific types of crashes and the comparison with control data, if possible.
- (The appraisal team leader may decide not to assess the crash data prior to a site inspection, to reduce possible bias towards existing crash locations);
- Assessment of risks in terms of the risk assessment pertaining to specific concerns, whereby the appraisal team would make a qualitative judgement of the importance of remedial measures for specific concerns;
- Site inspections would have as important a role in preparing possible remedial measures, if not more so than in the case of design projects because junction layout information would not be readily available, for example. In particular both day and night-time site visits shall be conducted. (It should be noted that Google Earth Street View photographs are not a substitute for a site inspection.);
- Identification of road safety concerns should be done for all issues, irrespective of the fact that the origin may be routine maintenance related; Routine maintenance related concerns should be combined and reported separately in the road safety appraisal report.

3.2 Reporting

The road safety appraisal report shall have the same basic layout and content as that of a road safety audit report as described in Chapter 3 of the manual. The road safety appraisal report shall include recommended remedial measures in a way similar to the road safety audit reports.

It may be feasible to group the results of the road safety appraisal in terms of concerns noted at specific sites, recurring concerns along the route or features that are located along the route, rather than site specific, road markings for example. Specific attention shall be given to the analysis of crash data (provided the quality thereof is acceptable) and the subsequent identification of possible remedial measures based on the combination of the crash data and the site inspections.

Specific attention shall also be given to the recording of the level of risk and the constituent components thereof.
